Project Description

Issue Management System (IMS) The Issue Management System (IMS) is a robust digital solution designed to identify, track, and resolve issues efficiently within an organization. Whether it's project-related challenges, customer service tickets, or internal operational bottlenecks, IMS provides a centralized platform for managing issues with clarity, accountability, and speed.

- Issue Tracking & Logging** – Easily report and categorize issues with priority levels.
- Automated Workflow & Assignments** – Assign issues to the right teams with automatic notifications.
- Real-Time Dashboards & Reporting** – Gain insights into issue trends, resolution times, and team performance.
- Customizable Alerts & SLA Management** – Set deadlines and automated reminders for issue resolution.
- Audit Trail & History Tracking** – Maintain a complete history of actions for transparency and compliance.
